Von Terry Spear : Destiny of the Wolf (Silver Town Wolf) before purchasing it in order to gage whether or not it would be worth my time, and all praised Destiny of the Wolf (Silver Town Wolf):

Secrets and memoriesVon Helen HancoxThere seems to be a phase of strange names in books that I'm reading. The last book I read had the heroine named 'Stasi' which constantly made me think of East German secret police; in this book our

heroine is apparently named after a particularly irritating conifer tree, Lelandi. I found it rather hard to take her seriously and had a mental image of a fast-going tree that causes rows between neighbours (at least in the UK it does). Lelandi is a werewolf although in this book they aren't called werewolves but lupus garous (garoux?) She is visiting the Silver Pack to try to find out whether her sister's death by suicide was, in fact, murder. Lelandi has a letter from her sister which says that she is being blackmailed and so Lelandi goes to try to find out and also to avoid being forcibly mated to her sister's former mate, an abusive man. When Lelandi comes across the Alpha of the Silver Pack, Darien, who mated to her sister without realising she already had a mate, she discovers he's the man that she has been dreaming about for some time. But Darien and the others seem to think that Lelandi is Larissa, her sister, and vice versa. When someone tries to kill Lelandi the Silver Pack guard her - but they may not be able to keep her safe from elements within the Pack. Who killed Larissa? Who was her secret lover? Can Lelandi be kept safe from her family? Can she really work something out with Darien? This book had quite a developed plot which was interesting and went in several directions. The identity of the villain was clear to me before the end but it was interesting to see how he was unveiled. The world of the lupus garou is one of violence and summary justice and a surprising number of people died before the book was finished. The pacing was fairly good although I felt all the confrontations between villains and heroes seemed over unexpectedly quickly. What this book lacked was characterisation; there was a large cast of people in the story but I didn't feel I got to know any of them. The romance between Darien and Lelandi was perfunctory (they were fated mates so once they met, that was it) but Lelandi's interactions with her mate and the rest of the pack felt unexplored. The only truly interesting character was a human nurse who hung around and the opportunity for more interest in the character of the PI, as well as Lelandi's family, wasn't explored. This was a good read but the lack of characterisation meant that none of the characters were truly memorable. Originally published for Curled Up With A Good Book Helen Hancox 2008
